

Breast Sonography . . .

The alarming figures:

- Most common type of cancer among women in the U.S.
- 1 out of 8 women will develop breast cancer in the United States
- Breast cancer is the leading cause of cancer death among women of ages 40-59

Early detection is vital to women's lives!!

- 98% survival rate, if adequately treated within 5 years
- Metastatic cancer shows a survival rate of only 30% - 50% after 10 years

Ultrasound Evaluation plays a vital role in early detection and provides real-time guidance during interventional breast procedures.
